Live-Streaming Solution

SCHILLER
The Art of Saving Lives

SentioWeb™

IMPROVE PATIENT OUTCOMES

SentioWeb™ has been developed to help emergency and health-care professionals make informed decisions on the appropriate therapy in the shortest possible time. Data transmitted in real time by SCHILLER devices can be accessed remotely via web browser and allow experienced healthcare professionals to provide the team on the scene with immediate feedback.

A SOLUTION DESIGNED FOR EMERGENCY MEDICAL SERVICES

During an emergency intervention, the defibrillator transmits vital patient data to a remote location where hospital staff can monitor the patient's condition. This ensures that both field teams and remote professionals have access to the same vital information simultaneously. By providing a clear and continuous view of the patient's status, SentioWeb™

enhances coordination and decision-making. Whether in the field or in the hospital, medical teams can react faster and more efficiently, ensuring the best possible outcome for patients.

Remote
live-streaming

Accurate display of
waveforms and vital
parameters

Resting ECG and
intervention report

Pictures and notes
from the scene

Geo-location

Multiple-device
visualisation

KEY FEATURES

Multiple-device visualisation:

Data from multiple medical devices can be displayed on a unified dashboard.

Automatic Mapping and Geo-Location:

Track the movement of EMS teams in real time on a map.

Seamless Device Integration:

Compatible with cutting-edge equipment. SentionWeb™ enables reliable data transmission during critical situations.

Pictures and Notes:

Ability to send photos and notes from the scene to facilitate communication and better follow-up care after the rescue.

HIGH-END CYBERSECURITY

SentionWeb™ is cybersecure thanks to these features:

- ❖ Role-based access control
- ❖ Encrypted data transmission via TLS
- ❖ Cloud server on a HDS (Health Data Host) or local installation options
- ❖ Follows GDPR guidelines
